**§ 50.027 DISCHARGES INTO PUBLIC SEWER SYSTEM.**

*(A) Surface and other waters prohibited.*

(1) No person shall discharge or cause to be discharged any storm water, surface water, ground water, roof run-off, subsurface drainage, cooling water or unpolluted industrial process waters to any sanitary sewer.

(2) Storm water and all other unpolluted drainage shall be discharged to the sewers as are specifically designated as storm sewers, or to a natural outlet approved by the Superintendent.

(3) Industrial cooling water or unpolluted process waters may be discharged upon approval of the Superintendent to a storm sewer or natural outlet.

(4) Any waters containing toxic substances or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any waste treatment process including, but not limited to, causing the town to violate its N.P.D.E.S. permit(s), constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the wastewater treatment plant.

(5) Any waters or wastes having a pH lower than 6.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the wastewater works.

*(B) Certain waters and waste materials prohibited.* No person shall discharge or cause to be discharged any of the following described waters or wastes into any sanitary sewer:

(1) Any waters or wastes having a BOD5 daily 40 mg/l by weight or containing a toxic or poisonous substance in sufficient quantity to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, or create any hazard in the receiving waters of the sewage treatment plant;

(2) Any waters or wastes containing suspended solids of the character and quantity of more than daily 45 mg/l by weight or that unusual attention or expense is required to handle the materials at the sewage disposal plant;

(3) Any noxious or malodorous gas or substance capable of creating a public nuisance;

(4) Any liquid or vapor having a temperature higher than 150°F;

(5) Any water or waste which may contain more than 100 parts per million, by weight of fat, oil, or grease;

(6) Any water or waste which may contain more than 25 parts per million, by weight of soluble oils;

(7) Any gasoline, benzene, naphtha, fuel oil or other inflammable or explosive liquid, solid or gas;

(8) Any garbage that has not been properly shredded; and

(9) Any ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, paunch manure, or any other solid or viscous substance capable of causing obstruction to the flow in sanitary sewers or other interference with the proper operation of the Sewage Treatment Plant;  
(Prior Code, Ch. 21, Art. XI)

(10) Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances to such degree that any such material received in the composite wastewater at the wastewater treatment works exceeds the limits established by the Superintendent for such materials;

(11) Any waters or wastes containing odor-producing substances exceeding limits which may be established by the Superintendent;

(12) Any radioactive wastes or isotopes of such half-life or concentration as may be exceed limits established by the superintendent in compliance with applicable state or federal regulations;

(13) Quantities of flow, concentrations, or both which constitute a “slug”, as defined herein;

(14) Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters;

(15) Any water or wastes which, by interaction with other water or wastes in the public sewer system, release obnoxious gases, form suspended solids which interfere with the collection system, or create a condition deleterious to structures and treatment process; and

(16) Any water or wastes subject to the categorical pretreatment standards pursuant to 40 C.F.R. part 403 (etc.).
